

HOW TO FIND THE RIGHT SIZE OF YOUR RING

Find the perfect size for your ring by measuring the finger on which you have chosen to wear it, with a soft tape measure, such as the one used to take measurements in the tailor's shop. Wrap the tape measure around your finger, read the measurement and compare it with the ring size chart below to check correspondence between your measurement expressed in cm (first column) and the size.

Finger size can vary depending on the time of day and temperature. We recommend you measure the size of your finger at the end of the day, avoiding measurements on hot or cold days.

We recommend selecting a ring size that can be easily put on and taken off your finger. If your ideal fit falls between two sizes, we recommend choosing the larger one.
